The Economist

Index to volume 279
April to June 1981 inclusive

25 St James's Street London SW1A 1HG LA - Leading Article / BB - Business Brief / SB Science Brief

Since the issue of 7th February, 1981, the North American circulation of The Economist has been printed in the USA. The editorial content of the American-printed issue is just the same as that of issues printed in Britain, but because of differences in advertising content the page numbers may be different. This index shows both sets of page numbers. In each entry, the page number for the UK-printed issue is given first, in Roman type, followed by the page number for the American-printed issue, in italics. The American-printed issue is circulated in the USA, Canada and Mexico, and the UK-printed issue in the rest of the world. If you are not sure which issue you have, check the note at the foot of the contents digest, which reads either "Printed in the UK" or "Printed in the USA".
